

HOTEL LES ARMURES GENÈVE

The safety and wellbeing of our guests is our top priority. Everyday, we are applying the highest standards of hygiene that we have strengthened and adapted for the greatest comfort and safety of our visitors.

As part of the standard COVID-19 protection plan for Swiss hotels:

The hotel and restaurant are following strict government guidelines for sanitization processes and all staff are fully trained with these hygiene protocols.

The cleaning of the rooms follows rigorous procedures using hospital-grade disinfectant on all areas.

All common areas are disinfected several times throughout the day including elevators, door handles, room keys etc.

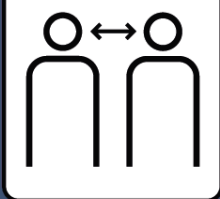

The ventilation systems are dual-flow differentiated. This ensures the quality of the air by maintaining the flow rates adapted to the needs of the building with protection against indoor and outdoor pollutants due to the filters.

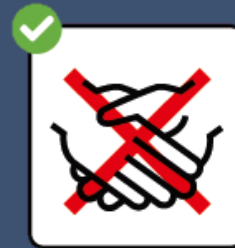

Monitoring the hygiene measures of the Federal Office of Public Health (OFSP)

VOICI COMMENT NOUS PROTÉGER:

Garder ses distances.
